

Audio/Video Console Subwoofer 1000

Now You Can Enjoy Room-Shaking Bass with No Visible Subwoofer

Introducing an “invisible” yet powerful subwoofer you don’t have to see to appreciate.

For maximum performance, many home theater experts recommend using a separate subwoofer for both front left and front right channel speakers. Centra Audio/Video Console Subwoofers are powerful, dynamic subwoofers. What’s more, their custom design allows them to be neatly tucked away inside Centra Audio/Video Consoles. You’ll enjoy the high-performance sound of a full range front speaker system where the subwoofers are “invisible”.

Out of sight and in style.

Console Subwoofers are among the simplest subwoofers to install and enjoy. There’s no having to decide where to hide big, heavy-looking black boxes because hidden compartments in Centra Audio/Video Consoles were designed to stylishly conceal Console Subwoofers—one on each end. If you choose to showcase your Console Subwoofers, the elegant black satin finish will blend nicely into your room décor.

Internal amplifier power gives you deep bass that’s exceptionally musical.

A 250 watt internal amplifier provides the power needed to hear and experience movies and music as the directors and producers intended them to be heard. Patented speaker design with ultra-fast response delivers more punch from a smaller cabinet. The bottom line: now you can experience bass you can feel that’s literally out of sight.

Beautiful presentation. Seamless design.

Powerful performance. Centra by M·Design.

A 10" woofer and 250 watt internal amplifier provide powerful, deep bass.

Centra Audio/Video Console Subwoofer shown inside Centra Audio/Video Console 600 (sold separately)

Features:

- 1 Uniquely designed to be concealed in Centra Audio/Video Consoles
- 2 Two subwoofers provide balanced bass audio, avoiding the balance problems of a single subwoofer set in a corner
- 3 10" cones are attached to high-excursion rubber surrounds for dynamic, powerful performance. Patented neodymium magnet structure provides more magnet strength in a smaller size for ultra-fast bass response
- 4 Connections and controls easily accessible from the rear of all Centra Audio/Video Consoles
- 5 High-performance 250 watt internal amplifier gives you the immediate power you need for today's bass intensive movies, music and video games
- 6 24k gold-contact binding posts for speaker level inputs
- 7 24k gold-contact RCA inputs for line-level input and output
- 8 "Gain" and "Crossover" controls
- 9 "Phase" control ("Normal" or "Reversed")
- 10 Amplifier "Mode" control ("Auto", "On", "Off")
- 11 Internally wired with frequency specific Monster Cable®
- 12 Add optional Centra SteamLine Towers, Center and Surrounds to create the ultimate home theater experience
