

StreamLine™ Surround 2400

Introducing a Sound System That Surrounds You with Beauty and ‘Ultra-Realistic’ Sound

Enjoy exciting, dynamic surround sound without aesthetic compromise.

Centra StreamLine Surround 2400 produces sound so clean and so real you will swear you’re “there”. Deep gloss piano black grilles compliment virtually any décor, or select deep or light cherry grill options to pamper your design sensibilities. The anodized aluminum finish gives Centra Surrounds a modern feel tempered with a graceful beauty.

StreamLine Surrounds embrace the style of every Centra product.

Designed to match the design cues and presentation of Centra StreamLine Towers and Audio/Video Consoles, StreamLine Surrounds offer you the dynamics and powerful sound of its line array technology—this way, no single speaker has to work too hard. You’ll enjoy wide dynamic range, ultra-low distortion and a “wall of sound” effect that surrounds you with sound.

Anodized aluminum grilles with hardwood accents conceal ingenious patented speakers.

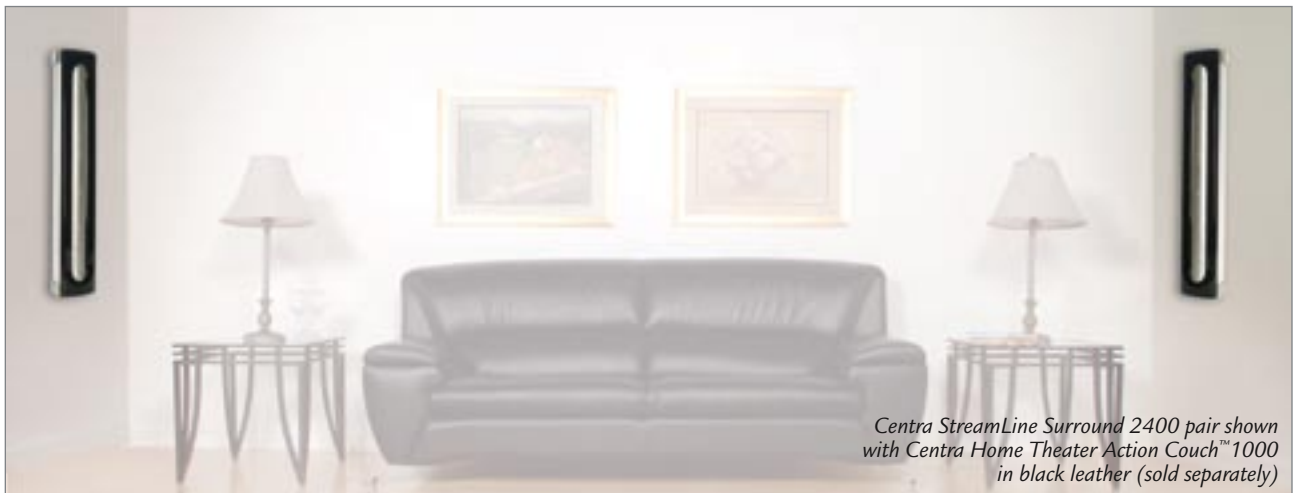

Lightweight neodymium magnet structures, dual radius half-roll surrounds, and a large diaphragm-to-magnet clearance work harmoniously to give you dynamic, powerful mid-range audio. The single wide-dispersion Audio Focus™ line-source tweeter produces crisp highs for pinpoint imaging and a surprisingly wide soundstage.

Beautiful presentation. Seamless design.

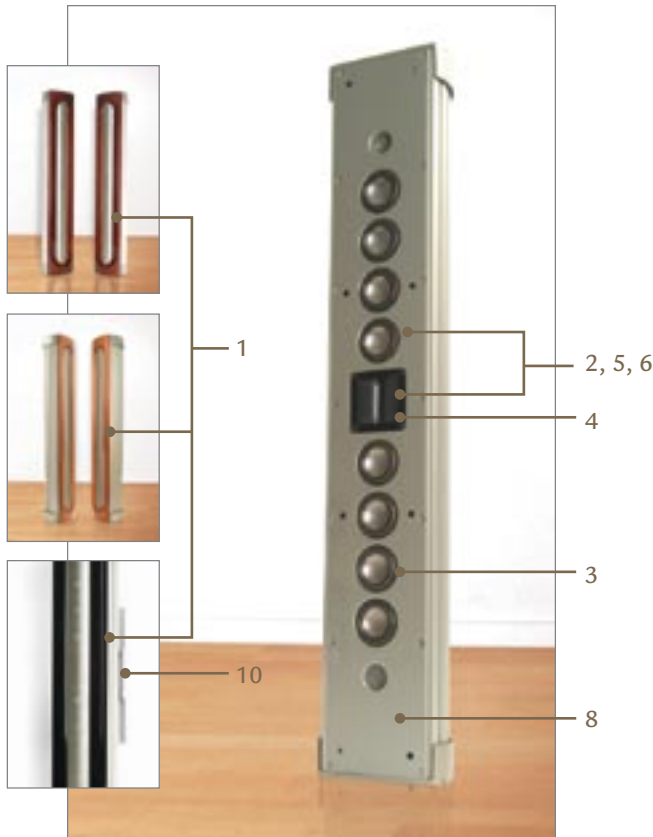

Powerful performance. Centra by M·Design

Centra StreamLine Surrounds feature two types of high-resolution drivers—9 drivers on each surround that faithfully reproduce ultra-realistic movie special effects, as well as crystal-clear multi-channel audio.

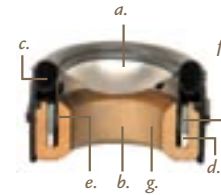

Centra StreamLine Surround 2400 pair shown with Centra Home Theater Action Couch™1000 in black leather (sold separately)

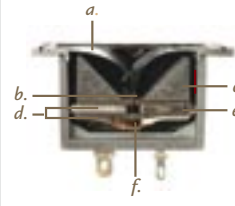

Patented Centra Speaker Technology

Centra Mid-Range Driver

- 2-Inch Centra Mid-Range Driver:**
- a. Inverted titanium diaphragm
 - b. High-excursion design
 - c. Long-throw, oversized, balanced suspension
 - d. Distortion shorting ring
 - e. Low-mass voice coil
 - f. Radial neodymium magnet
 - g. Extra large air vent

Audio Focus Line Source Tweeter

- 2-Inch Audio Focus™ Line Source Tweeter:**
- a. Ultra-light silk diaphragm
 - b. Patented line-source drive for wide dispersion
 - c. Foam damping material
 - d. Dual magnetic air gaps for high-efficiency
 - e. High-energy neodymium magnets
 - f. Patented low-inductance, flat voice coil
